

Activating the care extender benefit

Medihelp rewards members for taking care of their health through the care extender, activated by going for specified health tests.

Step 1

Any family member goes for any of the following:

Step 2

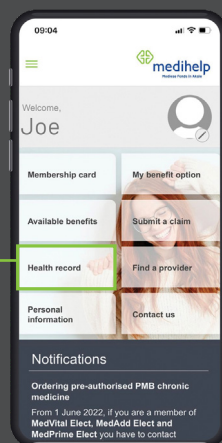

The claim is processed and the test results are uploaded to members' health profile on HealthPrint, unlocking the applicable benefit.

Step 3

Enjoy the additional care extender benefits that have been activated:

Added insured benefits

- A Pap smear per three-year cycle (women 21-65 years)
- A mammogram per two-year cycle (women 40-75)
- A prostate test (men between 40-75 years)
- An FOBT test for people between 45-75 years
- One bone mineral density test per two-year cycle (women >65 years)

Members can access their health records on the Medihelp app.

One extra GP consultation

- A combo health screening (blood glucose, cholesterol, BMI, and blood pressure) at selected pharmacy clinics in the Medihelp Preferred Pharmacy Network.

An additional
R490
for the family for self-medication

Note: The care extender is not activated if the beneficiary who undergoes the health screening has registered for a prescribed minimum benefit (PMB) or chronic medicine benefit related to the mentioned health tests. The care extender benefit applies to all options, except MedMove! Benefits are paid at 100% of the Medihelp tariff.
